

I TRY TO THINK ABOUT ELVIS

Intro: B7 arpeggio on piano (Stop)

Oh, I'm sorry I forgot where I was

[Bass guitar](1, 2, 3)

(Drums and bass)

I try to think about Elvis, Memphis Oprah in the afternoon

I try to think about palm trees, fig leaves

The creature from the black lagoon

I try to think about high heels, and good deals

Anything to get me through

I just can't concentrate

You're all I think about these days

(Stop)

I try to contemplate the cosmos, what goes round and round the sky at night

I try to think about champagne, freight trains

Slowly rolling out of sight

I try to focus on the headlines, street crimes

Every time I think I might

I just can't concentrate

You're all I think about these days

My mind wanders where it will

When it settles right on you

I forget what I should say

I forget what I should do

Guitar then piano solo 8 measures

My mind wanders where it will

When it settles right on you

I forget what I should say

I forget what I should do

(1, 2, 3, 4 Stop)

Uh, c'mon Erin get it together

I try to think about Shakespeare, leap year The Beatles or the Rolling Stones

I try to think about hair-do's, tattoos

Sushi bars and saxophones

I try to think about the talk shows, new clothes

But I guess I should have known

I just can't concentrate

You're all I think about these days

You're all I think about these days
